

Jigsaw Safe Operations Procedure

1. Operate only with the instructor's permission and after you have received instruction.
2. Remove jewelry, eliminate loose clothing, and confine long hair.
3. Make sure all guards are in place and operating properly.
4. Always wear safety glasses.
5. All materials should be inspected for defects such as warps, knots and foreign objects.
6. Avoid accidental starting. Be sure switch is off before plugging in.
7. Do not carry tool with your finger on the trigger.

8. Removing adjusting keys or wrenches before turning tool on.
9. Do not overreach. Keep proper footing and balance at all times.
10. Always clamp work piece to the bench or stable platform making sure the bench is clear of the cutting path.
11. Do not force tool. Keep blades sharp and never use dull blades.
12. Should a jigsaw get stuck in a material while cutting, you should stop the saw, unplug it and safely remove the blade. Clean out the kerf and start again.
13. Allow tool to come to a complete stop before withdrawing blade from the kerf. A moving blade may come into contact with the work piece causing a broken blade, damaged work piece, or loss of control and result in injury.
14. Disconnect tool from power source before making any adjustments, changing accessories, or storing tool.
